## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 4\_Q4

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Arjun is learning how to filter words from a sentence based on grammar rules. He wants to identify the valid words in a sentence.

A word is considered valid if it satisfies all these conditions:

The word contains only alphabets (a-z, A-Z). The word length is at least 2 characters. The word should not contain digits or special characters.

Your task is to read a sentence and print all the valid words in it.

##### ***Input Format***

The input contains a single line containing a sentence S.

##### ***Output Format***

The output prints all the valid words separated by spaces.

If no valid word exists, print "No valid words."

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: Hello world1 123 ab" @\$ Hi

Output: Hello Hi

### **Answer**

```
import java.util.*;

class ValidWords

{

    public static void main(String[] args)

    {

        Scanner sc = new Scanner(System.in);
        String sentence = sc.nextLine().trim();

        String[] words = sentence.split(" ");
        List<String> validWords = new ArrayList<>();

        for (String word : words)

        {

            if (word.matches("[a-zA-Z]{2,}"))

            {
```

```
        validWords.add(word);  
  
    }  
  
    }  
  
    if (validWords.isEmpty())  
    {  
  
        System.out.println("No valid words.");  
  
    } else  
    {  
  
        System.out.println(String.join(" ", validWords));  
  
    }  
    }  
}
```

**Status :** Correct

**Marks :** 10/10
